National Human Development Reports process
NHDRs Process

1. Key steps in the NHDR preparation
2. Measurement and analysis
3. Responses and influence

1. NHDRs: a complex process

1. Preparation stage
   - Theme selection
   - Resource mobilisation
   - Building the team
   - Training and orientation
   - Communication strategy

2. Research and Writing
   - Research
   - First full draft
   - Draft for external reviewers
   - Final draft
1. NHDRs: a complex process

3. Production
   – Creative presentation
   – Tailor to readers
   – Diversity of presentations

4. Advocacy and follow up
   – Media and communications
   – Launch and outreach strategy
   – Marketing and dissemination
   – Monitoring and assessing response
1. The importance of an inclusive process

- **216 events** to gauge opinions and gather voices, proposals and commitments
- **4,369 people** throughout the different territories: community members, local leaders, civil servants, government representatives, academics, businessmen and women, workers, country workers and farmers, displaced people, the disabled, those reinserted into society, women and the elderly, young people, homosexuals, indigenous people and people of African descent.

 Colombia – Valle del Cauca sub-national HDR 2008
“On the path to an inclusive and peaceful Valle del Cauca”
1. The importance of an inclusive process
2. Measurement and analysis

Rigour and impartiality

**Analysis**
- Transparency
- Multi-disciplinary
- Peer review
- Relevance
- Synergy between data and analysis

**Measures**
- Monitor progress
- Disaggregate (identify inequity)
- Clear data sources
- Partnership with NSOs
2. Measurement and analysis

- GIS based software to map social service delivery in underdeveloped areas
- Human Development radars:
  - Attainments in 8 HD indicators compared in different areas
  - Special surveys to collect data on migration, the Sabar Community and food security
2. Measurement and analysis

- Identify persistent patterns of deprivation to be analysed
- Identify data gaps
- Survey of the most disadvantaged Roma communities (5,000 interviews in 4 countries)
  - HDI for the Roma
  - MDG disaggregation for the Roma

Avoiding the Dependency Trap
- The Roma HDR Europe and the CIS 2003
2. Measurement and analysis
3. Responses and Influence

How do HDRs make a difference?

- National policies revised
- Budget priorities shifted
- Human development data in statistical systems
- Prominent media coverage and CSO campaigns
- People-centered curricula

Challenges

- Attribution: identify NHDR contribution in an environment of competing advisory services
3. Responses and Influence

- Re-definition of “rural” in public statistics and policies
- Citation of the report in the presidential agenda
- Inclusion of the **HDI in the prioritization index** used by the Ministry of Planning to allocate funds
3. Responses and Influence

- **New indicator** to measure knowledge
- Participation of **400 academics** from Arab universities
- **Report now used in the curricula** of Cairo University, Jordan University, Kind Saud University and Al-Akhawayin University

Arab HDR2003: “Building a Knowledge Society”
3. Responses and Influence
