

INSTRUCTIONS TO GET YOUR STATA READY

Install Stata 9.2 or higher in your computer.

Steps to install the Inequal adofiles in your Stata:

1. Open Stata. In the Stata command window, type the syntax:

```
findit inequal
```

2. Select gr0001_2 and click on 'click here to install'.

Do the same with:

```
gr0001_1
```

```
sq115
```

```
sq117
```

```
sg30
```

ainequal from <http://fmwww.bc.edu/RePEc/bocode/a>

3. Analogously: Type: *findit sg108*, click on the link

<http://www.stata.com/stb/stb48>, and then click on 'click here to install'.

Steps to follow to install DASP in your computer:

Before using modules of this package, users have to update the executable Stata file to Stata 9.2 or higher:

<http://www.stata.com/support/updates/stata9.html>

update the ado files:

<http://www.stata.com/support/updates/stata9/ado/>

Or by typing in the command window: *update query*, and then: *update al*).

Then:

7

1. Go to <http://dasp.ecn.ulaval.ca/>, create your account. You will receive an e-mail with your username and password.

2. Go again to the page and login.

3. Download DASP V2.0

4. Unzip the dasp.zip in the directory C:

5. Copy the folder dasp in the directory c:

6. Make sure that you have c:/dasp/dasp_p1.pkg, c:/dasp/dasp_p2.pkg, c:/dasp/dasp_p3.pkg and c:/dasp/stata.toc;

7. Open Stata. In the Stata command window, type the syntax:

```
net from c:/dasp
```

```
net install dasp_p1, force
```

```
net install dasp_p2, force
```

```
net install dasp_p3, force
```

8. To add DASP submenu to STATA main menu (so that when you select 'User' in your Stata window, at the bottom appears DASP), **it is possible that this is automatically done**, but in case it is not, check that the file **profile.do** (which is provided with the DASP package) is copied into the directory c:/ado/personal (create a new folder "personal" if this does not exist). To check if the file **profile.do** exists, type the command: *findfile profile.do*

9. Open again Stata and select from the mainmenu USER => DASP

For further explanations, please check the DASP Manual, which comes in the package you will download from the website.

If you are using a **Mac**, follow the same instructions above, with the following exception:

With Stata 9, copy the "dasp" folder and the "profile.do" file in the folder /Users/your_name/data

With Stata 10, copy them in the folder where the Stata executable file is, usually /

Applications/Stata 10.
